

## **Sampling Collection Site Open for COVID-19 Testing**

### **Great Lakes Bay Health Centers - Bayside**

Beginning Thursday, April 9, 2020, Great Lakes Bay Health Centers will be providing sampling collection for COVID-19 testing (Coronavirus) for people living in the Bay County and surrounding areas. We have set up a sampling collection site at our Bayside Health Center.

**Location: Great Lakes Bay Health Centers - Bayside**  
**3884 Monitor Rd.**  
**Bay City, MI 48706**  
**(989) 671-2000**

**Hours: Monday - Friday 12:00pm-4:00pm** or until testing supplies run out each day.

**This is a drive through site and tests are limited.**

**You must have the following with you to receive sampling collection for COVID19 testing:**

- 1. Must have a paper lab order from your doctor or health care provider for COVID-19 testing.**
- 2. The lab order must have the doctor/provider's Quest Account Number on it. The test CANNOT be performed without this because Quest Labs uses this number to contact your doctor/provider with results.**
- 3. You should have a sheet/paper from your doctor that contains your name, date of birth, address, phone number, insurance name and number. If this sheet was not given to you, the information can be filled out on the lab slip. A staff member can help you with this part at the check point if you need assistance.**

**Please note:** New patients or people with no primary care provider wanting to establish care related to COVID Symptoms and/or known exposure, please call (989) 671-2000 for assistance.
